Subject: fire-resistance self-certificate

The self-extinguishability of **Igepa Dotfix white matt 100 μ** has been analysed following the norm ISO 3795, and verified in our laboratories.

The method applied is the following:

- Application of the product on an aluminium plate 2mm thick.
- The self-adhesive film was set to fire with the help of a blowpipe for 30 seconds.
- The plate was removed from the flame.
- After 30 seconds, the self-adhesive film was inspected if it was still burning or not.

With regard to **Igepa Dotfix white matt 100 μ** , we have verified that the film does not burn. Therefore we can conclude that this self-adhesive material is self-extinguishable according to the norm ISO 3795.
